

SolydXK

SolydX & SolydK Linux Distributions

Background

- Debian-based Linux distributions, Testing branch.
- Founded in March 2013 by Arjen Balfoort. Based in the Netherlands.
- Originally based on Linux Mint Debian Edition.
- SolydX uses Xfce desktop environment.
- SolydK uses KDE desktop environment.

Goals

- Simple to use
- Stable
- Secure

Update Methodology

- Semi-rolling release cycle
- Uses monthly “Update packs” that have current and stable packages, rather than cutting-edge versions
