

March 2013 WMLUG Meeting

openSUSE 12.3 Demo

Patrick A. TenHoopen

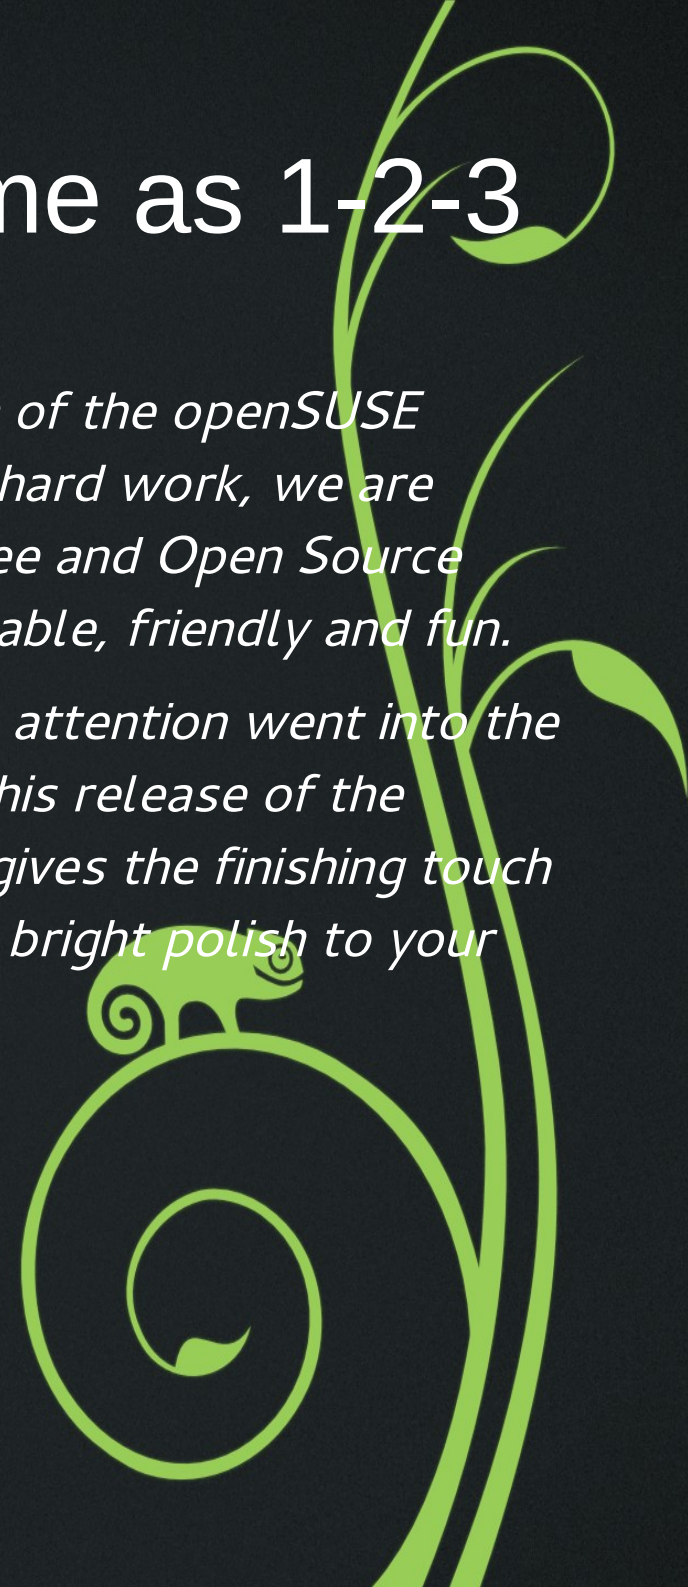

openSUSE 12.3 - Awesome as 1-2-3

“Dear contributors, friends and fans: the latest version of the openSUSE distribution, 12.3, is ready for you! After 6 months of hard work, we are happy to bring you the mash of the best things that Free and Open Source Software has to offer with the unique green sauce - stable, friendly and fun.

As this was a shorter-than-normal release cycle, much attention went into the details and we bring you a very refurbished product. This release of the world's most powerful and flexible Linux Distribution gives the finishing touch to our boot infrastructure and package management, a bright polish to your desktop and a touch of cloud for your server.”
